

## DIABETIC RELEASE

\*\*\* Any A1c number about 6.3 is considered HIGH \*\*\*

I understand that my A1c and glucose level is above the healthy limit and could adversely affect the healing and success of my dental implant or dental surgery. Adverse reactions from having a higher than normal A1c or glucose can impair healing, which can increase the risk of tissue necrosis, can elevate risk of peri-implantitis (infection), or can impair osseointegration (implant becomes mobile).

I have been diagnosed with Diabetes type \_\_\_\_\_

My A1c is usually or at my last check-up \_\_\_\_\_

My Diabetes is controlled with \_\_\_\_\_ Medication

\_\_\_\_\_ Diet & Exercise

Patient signature \_\_\_\_\_ Date \_\_\_\_\_
